

BIOSYMPATHY

THERAPEUTIC GUIDE & YOGA

B 461 [BIOSHIRSUTISM]- VINCA MIRORA plant extract bioenergy. Bioshirsutism is prescribed in the symptoms associated with abnormal hair growth on the face of women, sanguineous vesicles in internal surface of upper lip, menses too late or too short. If we say in any medical language that it is a system without glands which release secretions on body is called hormones. When a child become matured, hair will grow in which part of the body, at what age beard and mustache will appear in boys, beard and mustache will not grow in girls, all this things are decided by the hormones. These all hormones increase or decrease in quantity then this affects the structure of the body. Such secretion is known as "internal secretion." The gland above the kidney is called " Suprarenal Gland". The secretion of this gland gives power to blood vessels. Often it becomes a tumor as a result of which hair grows on face of females. The job of androgens hormones is to stimulate the process of growing hair in external genital and ekjila of a child who are getting matured. Hyperactivity of androgens hormones produces Hirsutism. There is premature adolescence in males. If the female menstruation is over / off then in this case female's hormones are which result in growth of unwanted hair on face. In this case, if we have this medicine patiently , we will definitely get positive result.

DOSAGE: 10 drops of medicine with ¼ cup of water to be taken orally 3 times a day or as directed by the Biosympathy Physician.

B462 [BIOSHYDROCELE] – MALVA SYLVESTERIS plant extract bioenergy. Bioshydrocele is prescribed in the symptoms associated with inflamed and infected testicles, hydrocele, testicles painful, drawn up, glance feel crushed, indurations and swelling of testes. Each testicle is an oval organ, whose outer layer is covered and secured by many of layers of stomach. Its own outer layer is composed of thick fibers and is like a capsule. Some of the filaments get out of these capsules and enter into the tissues of the testicles and divide the testicle into 250 fragments. In each of the fragments there are blood vessels and cells in which tester on hormones are secreted. Each spermatogenesis tubule is 60 – 75 meter long and diameter of near about 200+20 micron. Due to some reasons the testicle pouch expands after accumulation of water in it. But if the sperm solidifies inside these tubules to fat then it causes difficulty. This may be caused due to any of the reasons. It may be inbred or may be due to some injury. This medicine is effective in all the inbred and other reason led symptoms.
